# Chapter 1. Introduction

The Medication Adherence Sensor is a professionally calibrated sensitivity sensor. You can place this sensor on a portable pill box to track how often it is used. Share activity logs with medical professionals or caregivers.

Key features and specifications of the sensor.

- Works with all Home8 systems
- Self-Configuring and easy installation
- Device is not controlled by the Arm/Disarm Remote Control
- Internal Antenna
- Low battery status alarm
- LED indicator
- 4-axis acceleration detection/monitoring

## 1.1 System Requirement

This section explains the system requirements when using the sensor.

Network	Router with <ul style="list-style-type: none"><li>- 10/100Mbps RJ45 LAN port</li><li>- DHCP service</li></ul>
Mobile Device	An Apple iPhone, iPad, or Android mobile device with: <ul style="list-style-type: none"><li>- iOS (version 8.1 above)</li><li>- Android (version 4.1 above)</li></ul>

\* See Appendix – Glossary of Terms.

## Chapter 2. Hardware Overview

---

This section provides an overview of the Medication Adherence Sensor.

# Chapter 3. Medication Adherence Sensor Setup

## 3.1 Power on the sensor

Before using the sensor, please remove the plastic pull tab from the sensor to power it up.

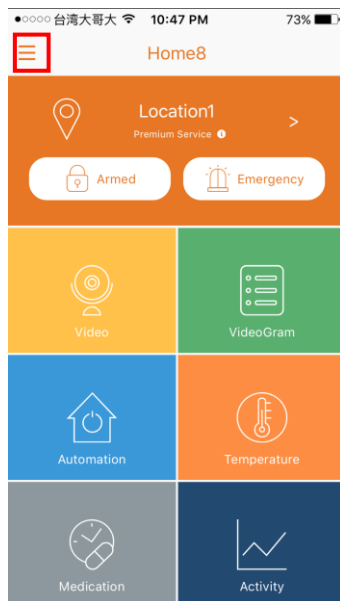

## 3.2 Adding the Sensor to the System

Before you begin using the sensor, it will need to be added to the system first. For details, see the subsections below. To activate the sensor, complete the following steps.

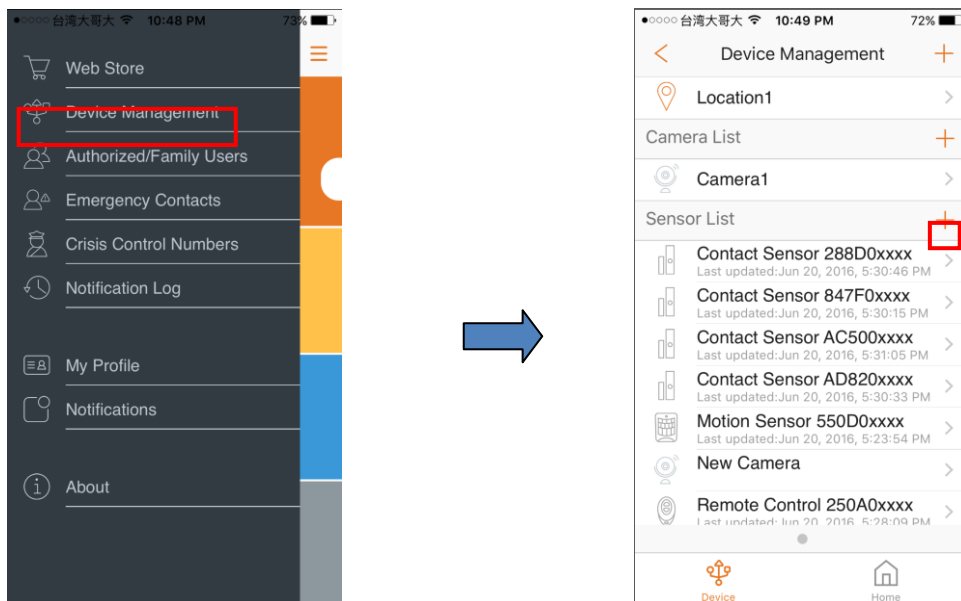

Note:

Make sure the Security Shuttle is powered on and connected to your router.

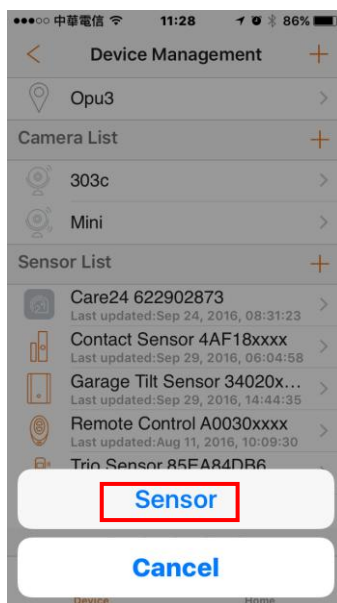

1. Tap the menu icon  to show the sidebar menu.

2. Tap “Device Management”. If you have more than one security shuttle, you may need to swipe left more than once to find the one you want the sensor to connect to. After selecting the security shuttle, tap the plus icon “+” located to the right of “Sensor List”.

3. Select “Sensor”.

4. Follow the on-screen instructions. When finished, press “Next”.

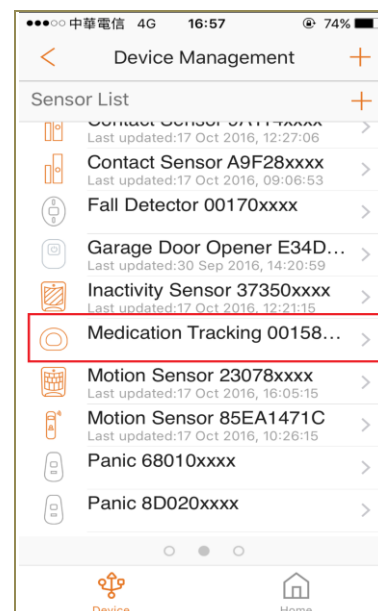

5. After scanning the QR code located on the bottom of the camera, the “sensor adding” process will begin.

6. When the activation is completed, the sensor will be added to the device management page. In the illustration shown below, the name of the Security Shuttle is “Location 1” and the name of the sensor is “Medication Adherence 00158xxxx”.

### 3.3 Positioning the sensor

After the “sensor adding” process has been completed, you can place the device on portable pill box.

## 3.4 Remove Sensor

To remove the sensor from the current Security Shuttle, tap “Remove Sensor”.

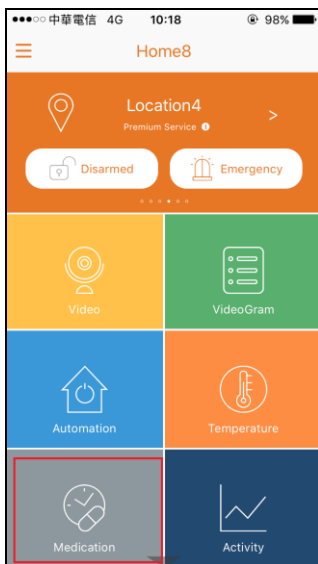

## Chapter 4. Starting to Use the Medication Adherence Sensor

*At this stage, your sensor is now ready for use.*

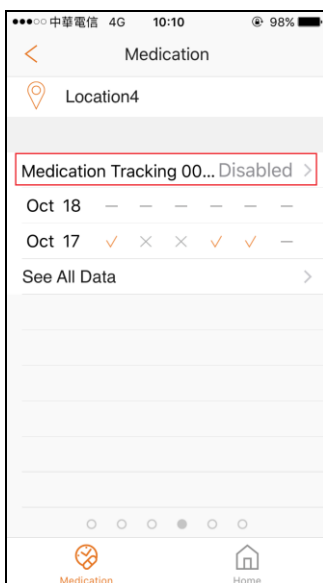

### 4.1 Medication Adherence

Regardless of the arming status, the Medication Adherence sensor will log the activities of the attached portable pill box and present the activities in two ways.

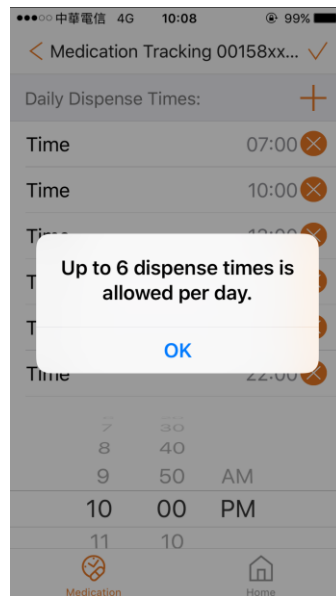

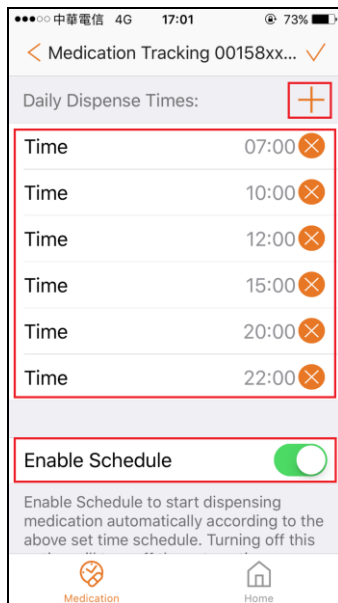

1. Tap the Medication icon to enter the Medication Adherence page.

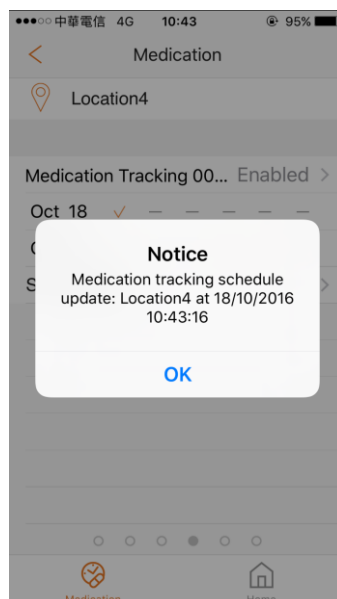

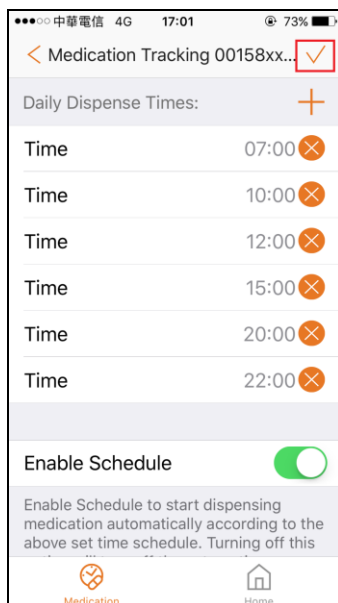

2. Tap Medication Adherence Sensor for setup schedule.

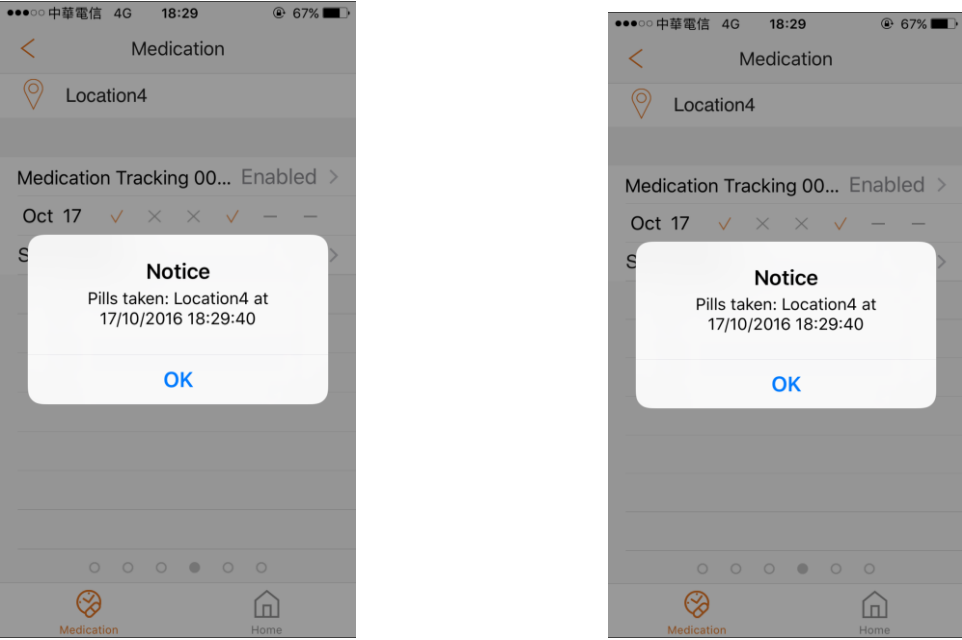

3. Click on the Add icon for adding more Daily Dispense Times and turn the “Enable Schedule” on. It allows you to add up to 6 dispense times per day.

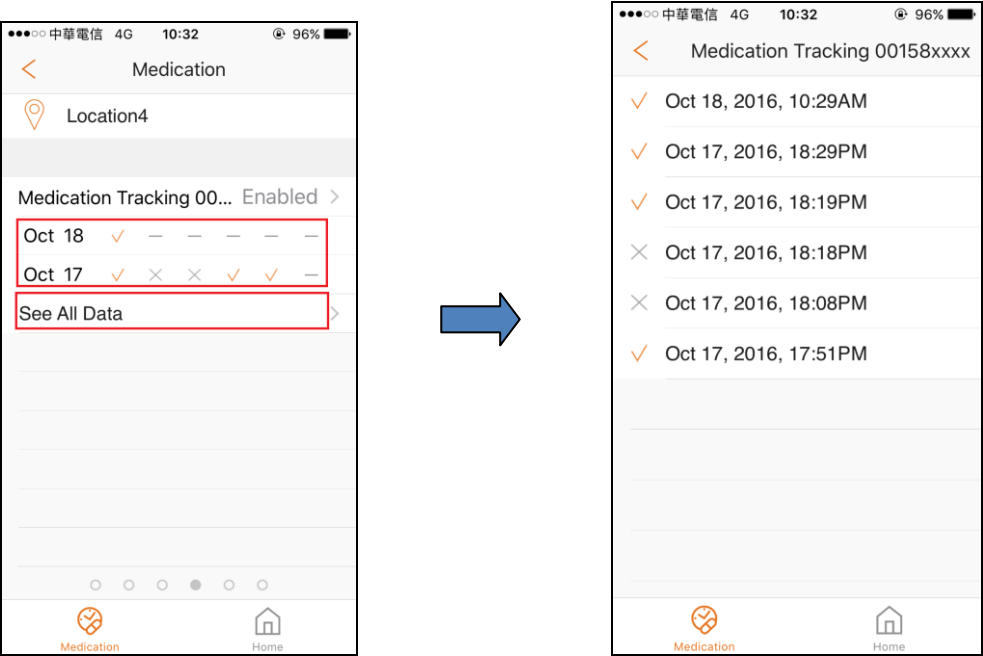

4. Click on check icon to finish the schedule setup.

5. When the schedule time is up, it will remind you to take pills and record it.

5. At the log page, you can have an activity record of up to 7 days and click on “See All Data” for more details.

# Appendix – Glossary of Terms

---

**Arm:** The cameras and other security related sensors in the system are actively monitoring the surroundings. Any suspicious activity that has been detected by the camera or sensor will prompt the app to immediately send a notification. A recording will also be performed by the camera(s) that witnessed the event.

**Disarm:** The cameras and other security related sensors in the system are no longer actively monitoring the surroundings. The system will not react to any suspicious activity detected by these devices. No notification will be sent.

**Note:** If the continuous recording function is turned on, video recording will always work regardless if the system is armed or disarmed. For more details regarding the continuous recording function, see *Section 4.8 Turn On/Off Continuous Recording*.

**Event:** An event is created when any camera or sensor detects an activity, or is manually triggered by the user.

**Security Shuttle:** Functions as a secure and intelligent hub to manage the devices and communicate with the cloud server. Currently, there are three types – **OPU1120**, **OPU2120**, and **OPU3120**.
