If the Security Shuttle is still offline after 5 minutes, please contact our Technical Support for further troubleshooting assistance.
Troubleshooting Tips

**Are your devices listed in your app?**
If you’re having trouble installing your devices, see if they’re listed in your Home8 app:
• Navigate to ☰ > Device Management to see if all your devices are listed.
• Tap + next to the device category and follow the on-screen instructions to add any missing devices.

**Are your devices communicating with Security Shuttle?**
• If your devices don’t connect to Security Shuttle, they might be too far away. Take them to a location that’s closer to Security Shuttle and try again.
• If they do connect, you’ll know the range of your device and where to install a range extender.
• Alternatively, you can move Security Shuttle closer to your device.
• If your devices still don’t communicate with Security Shuttle, even when they’re in the same room, navigate to ☰ > Device Management > + on the Home8 app to add your devices again.

**Do you need to reset your camera?**
If your camera isn’t communicating with Security Shuttle, your app may ask you to reset your camera.
• Remove the top cover and locate the pinhole.
• Insert a pin and hold for 3-5 seconds until you hear a beep.
• Return to the app and follow the onscreen instructions.
