

Mini Outdoor Full HD Camera Add-on Device Quickstart Guide

Model No. IPC2203

What's inside:

1x Mini Outdoor Full HD Camera

1x Power Adapter

1x Wrench

Power Waterproof Cases

Cable Waterproof Cases

Mounting Accessories

To save video clips locally or turn on the continuous recording function, a MicroSD card (FAT32, SDHC type) is needed.

Note:

1. Please insert the MicroSD card into the camera when it is powered off to avoid damage to the MicroSD card.
2. Video recording service require service subscription, please visit our website for more information

Operates on 2.4GHz Wi-Fi signal

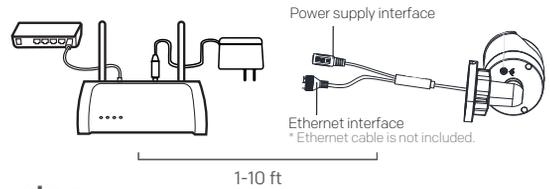

Note: 2.4GHz has better Wi-Fi transmission distance and is less prone to interruption from the obstruction of solid objects.
Virtual gateway does not support 5GHz Wi-Fi features.

All Home8 add-on devices have to work with Home8 systems.

Option 1: Add it with your existing Home8 system

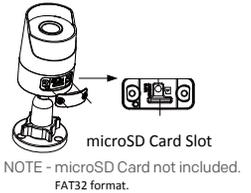

Step 1: Assemble your device and accessories

1. Unpack your devices and accessories.
2. Pair the device with the Security Shuttle within 1-10 feet to make sure the connection is working well.

Step 2: Power on the Camera and connect it to the system

1. Insert the microSD* card into the Camera Card Slot before powering up the Camera. You can also purchase a microSD Card at a later time.
2. There are two methods for powering and connecting. Please review the two options and decide which option you would like to use:

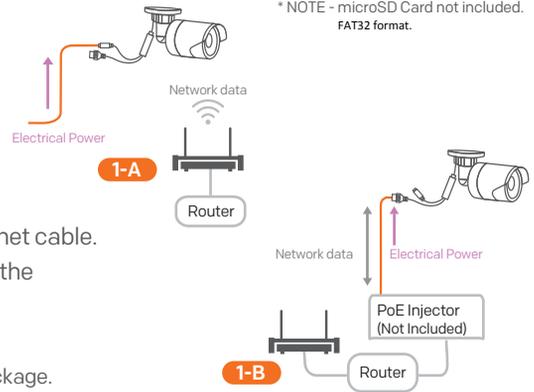

1-A: Wireless

Connect the included power adapter to the Camera's power supply interface.

1-B: Wired

Connect the PoE Injector to your home router with an Ethernet cable. Using the other Ethernet cable, connect the PoE Injector to the Camera's Ethernet interface. Power on the PoE Injector.

* Note: PoE Injector and Ethernet cables are not included in the package.

Step 3: Add a device

1. Open the Home8 app, tap on the menu button "≡" and select "Device Management".
2. Press the add button "+" next to Camera List.
3. Follow the app instructions to scan the QR code located on the device.

* Note: If the scan is incomplete, you will be asked to enter the serial number (SN) of the device.

Step 4: Before mounting your device

1. Before mounting your camera, see if it is within the Security Shuttle's range by taking the Camera to the place where you want it to be mounted and plug it in.
2. Wait until you see live streaming video from the Home8 app before mounting.
3. Go to **Step 5**.

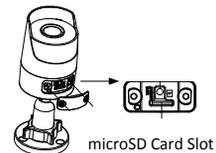

Option 2: Add it with Virtual Gateway (without Security Shuttle)

Step 1: Set up your smartphone

1. Connect your Smartphone to Wi-Fi.
2. Download the Home8 app from the App Store, Google Play, or Windows store and create an account.

Step 2: Assemble your device and accessories

1. Insert the microSD* card into the Camera Card Slot before powering up the Camera. You can also purchase a microSD Card at a later time.

* NOTE - microSD Card not included.
FAT32 format.

2. There are two methods for powering and connecting.
Please review the two options and decide which option you would like to use:

2-A:

Connect the Camera to your home router with an Ethernet cable* and power on the camera.

* For the best data transmission quality, the maximum length of Ethernet cable is 100 meters.

2-B:

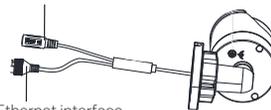

Connect the PoE Injector to your home router with an Ethernet cable.

Using the other Ethernet cable, connect the PoE Injector to the Camera's Ethernet interface.

Power on the PoE Injector.

*Note: PoE Injector and Ethernet cables are not included in the package.

Power supply interface

Ethernet interface

* Ethernet cable is not included.

Step 3: Add it to the System with Vitural Gateway

Note: Make sure your Wi-Fi router is on.

Make sure the Wi-Fi of your smartphone is on

1. Tap the side bar "≡" and select "Device Management".
2. Select "IP Camera".
3. Follow the on-screen instructions. When finished, press "Next".

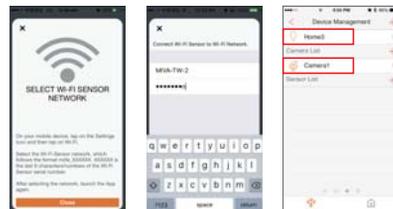

* Existing users:

Please swipe left across the screen

Step 4: Sync Virtual Gateway with Wi-Fi Network

1. After scanning the QR code, select your Wi-Fi network and enter the password if necessary. When finished, tap "Join".
2. Follow the on-screen instructions.

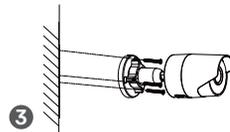

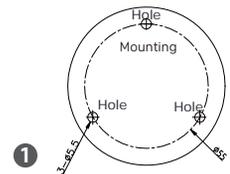

Continue to next page

3. After the activation is completed, you will see the message "System is ready!" on the screen. By tapping "OK", a virtual gateway and the camera will be added to the device management page.
4. (2-A) You now can unplug the cable from the camera or leave it attached.
5. Go to **Step 5**.

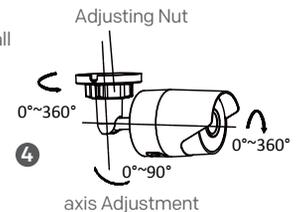

Step 5: Installation

Both wall mounting and ceiling mounting are suitable for the Camera. Wall mounting will be the example in this section. If you decide to go with ceiling mounting as your method of installation, then you can use the wall mounting steps as a reference.

1. Drill the screw holes into the wall according to the drill template.
2. Route the corresponding cables.
3. Secure the camera to the wall with the supplied screws.
4. Adjust the surveillance angle.
 - Loosen the adjusting nut.
 - Adjust the pan direction [0° to 360°].
 - Adjust the tilt direction [0° to 90°].
 - Rotate the camera [0° to 360°] to adjust the lens to the surveillance angle.
 - Tighten the adjusting nut to complete the installation.

Secure the Camera to the Wall

Troubleshooting Tips

If you're having trouble adding your device, you may need to reset it.

- Use the wrench to open the cover which is located on the bottom of the camera.
- Make sure the camera is powered off first. Press down and hold the RESET button for around 10 seconds until the IR LED goes off, and then power on the camera.
- Return to the app and follow the onscreen instructions.
