# Troubleshooting Tips

## Are your devices listed in your app?

If you're having trouble installing your devices, see if they're listed in your app:

- Navigate to **≡ > Device Management** to see if all your devices are listed.
- Tap + next to the device category and follow the on-screen instructions to add any missing devices.

## Are your devices communicating with Security Shuttle?

- If your devices don't connect to Security Shuttle, they might be too far away. Take them to a location that's closer to Security Shuttle and try again.
- If they do connect, you'll know the range of your device and where to install a range extender.
- Alternatively, you can move Security Shuttle closer to your device.
- If your devices still don't communicate with Security Shuttle, even when they're in the same room, navigate to **≡ > Device Management > +** on the app to add your devices again.
