24. 1x Gateway
25. 1x Infrared Motion Sensor
26. 1x RF433 Dongle
27. 1x L-shaped USB Adapter
28. 2x Door + Window Sensors
29. 2x Batteries (CR123A)
30. 4x Double-Sided Tapes

Broadband internet connection, iOS or Android phone and home router required.

Step 1: Connect to Network
Unpack all of your hardware within 20 feet of your home router for quick set up.

1. Plug in the RF433 Dongle to the Gateway with the included L-shaped USB adapter for best reception standing up.

2. Connect the Gateway to your router with the included Ethernet cable, then power on.

3. Install batteries and plug in power adapters to devices and sensors.

Step 2: Set up your smartphone

1. Go to Wi-Fi settings and connect your smartphone to Wi-Fi.

2. Download the Home8 app from the App Store or Google Play Store.

3. Follow the on-screen instructions and set up your account.

Step 3: Activate your system

1. Select Menu Icon on top left on the App and tap "Add Device" to activate system.

2. Find the QR Code Sticker on the Gateway and follow the instructions on your app.

3. When you see the "System is ready!" message. Congratulations, your system setup has completed!
Step 4: Place your devices

**Door + Window Sensor**
Use screws or Double-sided tape to attach sensor. Maximum distance between two parts is 1/4 inch.

**Infrared Motion Sensor**
Place the device in an area with no direct sunlight. The motion sensor has a 3 minutes cooldown period.

**External Siren**
Plug the power line. Place the siren.

**Use your Keychain Remote to Arm/Disarm/Panic**
Press the Arm/Disarm button. The LED light should blink. You will receive a push notification on your phone saying "System is armed/disarmed by keychain remote" if remote is within range. Hold either button for 5 seconds as trigger Panic button.

Step 5: Enable your service

1. On the home screen, tap the **Subscribe Now**.

2. Provide contact and payment method information.

3. Review order information and click **Place Order**.

Once your subscription is successful, the system status will change to "Practice Mode" for one day.

With our Professional Monitoring Service, after the 1-Day Practice Period, the system status will change to "In Service", you’ll receive 24/7 monitoring for your system.
