home8

What's inside:

- 1x Security Shuttle
- 1x Twist HD camera
- 4x Door + Window sensors
- 1x Keychain remote
- 2x Power adapters
- 1x Ethernet cable
- 2x Power cables
- 4x Batteries (CR123A)

What you'll need:

- Broadband Internet
- iPhone or Android phone
- Home router
Step 1: Assemble your hardware

Unpack all of your hardware within 1-10 feet of your home router.

- Connect Security Shuttle to your DHCP-enabled router with the included Ethernet cable
- Connect Security Shuttle and Twist HD camera to power adapters and plug them in
- Add batteries to your Door + Window sensors

Step 2: Set up your smartphone

Your phone will disrupt the setup process if it goes to sleep. So before you register your devices, disable the autolock feature on your smartphone. You can enable it after you’ve set up your system.

Next:

- Connect your smartphone to your home Wi-Fi
- Download the Home8 app from the App Store or Google Play
- Follow the on-screen instructions and set up your account
Step 3: Mount your devices

Before you mount your sensors, see if they’re within Security Shuttle’s range.

- Take your sensors to the rooms you want to use them in
- Open the battery cover of each device you want to install

If you get a notification that says your device has been tampered with, it’s within range. Replace the battery cover and mount the device with the included screws or double-sided tape.

Before you mount your cameras:

- Take them to the room you want to use them in and plug them in
- Wait for your cameras to connect

If you see video, place your cameras and enjoy.
Troubleshooting Tips

Are your devices listed in your app?
If you're having trouble installing your devices, see if they're listed in your Home8 app:
• Navigate to ☰ > Device Management to see if all your devices are listed
• Tap + next to the device category and follow the on-screen instructions to add any missing devices

Are your devices communicating with Security Shuttle?
• If your devices don’t connect to Security Shuttle, they might be too far away. Take them to a location that’s closer to Security Shuttle and try again.
• If they do connect, you'll know the range of your device and where to install a range extender.
• Alternatively, you can move Security Shuttle closer to your device.
• If your devices still don’t communicate with Security Shuttle, even when they’re in the same room, navigate to ☰ > Device Management > + on the Home8 app to add your devices again.

Do you need to reset your camera?
If your camera isn’t communicating with Security Shuttle, your app may ask you to reset your camera.
• Locate the pinhole on the left side of the camera
• Insert a pin and hold for 3-5 seconds until you hear a beep
• Return to the app and follow the onscreen instructions
